

FUN FACTS

PureFarm Lab

All about farming

Did You Know?

Farms grow more than food.

Cotton for clothes and wood for building start on farms too.

Good soil is alive.

It's full of tiny living things that help plants grow strong.

Farmers protect their soil.

Growing different crops each season keeps the ground healthy for years to come.

Corn is a giant.

It's the most-grown crop in the whole country, and one stalk can grow taller than your house.

Bees and ladybugs help farms.

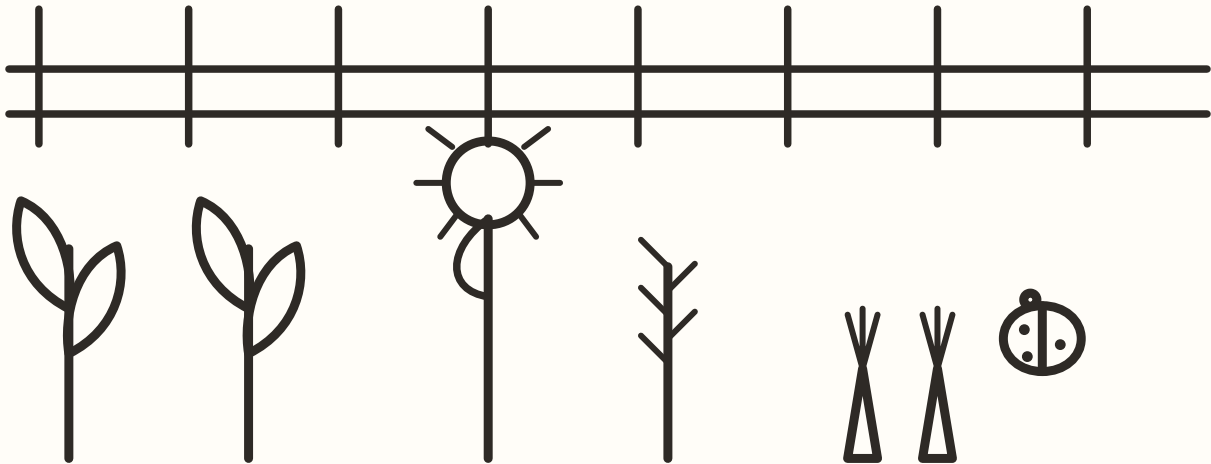

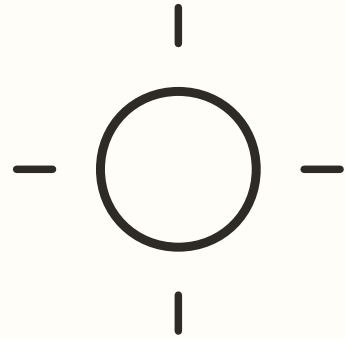

They pollinate flowers and eat pests that damage crops.

Sunlight is a farmer's best tool.

Plants use sunlight to turn water and air into the energy they need to grow.

TRY THIS

Plant a seed in a cup this week. Check on it every day and watch what happens.

Color the barn, the crops, and the sunflower.

Word Search

Find each word hiding in the grid.

☐ SEED☐ SOIL☐ FARM☐ CROP☐ SUN☐ WATER☐ GROW☐ HARVEST

Sort It Out

Which of these grow on a farm?

Write yes/no or circle each answer.

Corn

Car

Sunflower

Television

Bonus Challenge

Look at three foods in your kitchen. Can you guess which farm they came from?
